**No. 45.—Retail Trade—Total Value of Sales in New South Wales.**

(Source : Commonwealth Statistician.)

Statistics for 1947-48 and 1948-49 were compiled from returns supplied by each retail establishment in the State, but statistics for subsequent periods are based on returns collected from a representative sample of retail establishments. These preliminary figures may be revised when details of a complete census of sales for the year 1952-53 are available.

Particulars in Table 45 relate to the retail sales of goods (as distinct from services, accommodation, entertainments, meals, etc.) by establishments selling retail goods from fixed premises (shops, rooms, kiosks, yards) and include the retail sales of establishments principally engaged in wholesale, manufacturing or servicing activities.

## No. 88.—Stock Exchange Index (Sydney).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.

Average for Period.	23 Manufacturing and Distributing Companies.	10 Retail Companies.	8 Public Utility Companies.	5 Pastoral and Finance Companies.	5 Insurance Companies.	Total 75 Companies.*	34 Active Shares included in foregoing.

## No. 96.—Employment in Larger Private Factories, New South Wales.

In order to provide a prompt indication of the trend of employment in private factories, a survey of employment in 618 larger privately-owned factories in New South Wales is made each month, by joint arrangement between the Secretary of the Department of Labour and National Service and the Acting Commonwealth Statistician. Approximately half of total factory employment is covered by the collection, the results of which are available one month earlier than the particulars of total factory employment shown in Table 94.

## No. 99.—Export Price Index-Numbers—Australia.

(Compiled by the Commonwealth Statistician.)

These index-numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. For some metals, the prices are the average value of current realisations in various markets and hence show some irregularity. From July, 1945, to September, 1951, the export prices used for wheat in the index were average actual realisations for current shipments. From October, 1951, the prices used are the estimated average realisations after weighting prices of quota and non-quota wheat. In this index the prices of the commodities are weighted by the average annual exports (production in the case of gold) during the three years, 1933-34 to 1935-36.

(Base of each section: Average of 3 years ended June, 1939 = 100.)

**No. 100.—Wholesale Price (Basic Materials and Foodstuffs) Index-Numbers.**

(Compiled by the Commonwealth Statistician.)

Commodities in this index are priced in their primary or basic form wherever possible. The prices used in this index have in the main been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.

From August, 1950, to 30th June, 1951, a bounty was paid on raw wool purchased for local manufacture. The effective price, that is the open market (auction room) price less bounty, has been used in calculating the index numbers in this table.
